## DEFINITIONS

**Direct Notification:** Refers to the notifying individuals who have been affected by a privacy breach through direct mean including telephone, letter or in person.

**Disclose:** To make the information available or to release it but does not include a use of the information and “disclosure” has a corresponding meaning.

**Indirect Notification:** Refers to notifying individuals who have been affected by a privacy breach through indirect means including website information, posted notices or the media.

**Privacy Breach:** A privacy breach occurs when there is unauthorized and/or inappropriate access, collection, use, disclose or disposal of personal/personal health or business information. Such activity is “unauthorized” if it occurs in contravention of ATIPPA or PHIA. The most common privacy breaches occur when personal information of clients, employees or a corporation is stolen, lost or mistakenly disclosed. For example, a privacy breach occurs when a computer/laptop containing personal information is stolen or personal information is mistakenly emailed or faxed to the wrong person.
